Dear Sir:

AMENDMENT

In response to the telephone conversation with Examiner Gartenberg, please amend this application as follows:

IN THE CLAIMS

1. (TWICE AMENDED). A compressor comprising:
 - a motor for driving a compressor element;
 - a protection device for said motor, said rotation device being actuated if a predetermined temperature is exceeded at said motor;
 - a housing for enclosing said motor, said housing defining a housing chamber housing said motor;
 - a compression chamber for compressing a refrigerant, and said refrigerant passing through said housing chamber to said compression chamber, such that said refrigerant cools said motor; and
